61000

EXPERIENCE (PROJECTS)

- **TheMovieOg (project)**
a search webpage allow you to search for movies info from old movies to new and popular.
- **ConvertMyMoney (project)**
is a simple currency converter that allows you to quickly check the latest currency exchange, hourly updated conversion rates, currency converter is made with JavaScript using Rest API and works perfectly.
- **TheWeatherReport (project)**
a simple webpage where you can check your current weather and daily updated made with HTML/CSS/JS using Rest API.
- **CALL CENTER (MD KHARKOV)**
February-April 2019
We deal with consulting Americans who have got insurance policies about benefits that they have got. We help them to get medicine and orthopedic products at the expense of the company due to telemedicine.
- **Customer support (ORANGE-MOROCCO)**
June-September 2016
we offer fully support to clients and fix their problems with the opening of 4g technology in morocco back in 2016.
